

Minnesota Center for Multiple Sclerosis

Patient Resources: Community Groups & Initiatives

At Minnesota Center for Multiple Sclerosis, we are proud to be an active member of our greater MS community, locally and nationwide. We have been partnered locally with the MS Society, participating in *Walk MS* annually. Dr. Jonathan Calkwood serves the MS Society as both a Clinical Advisory Council Member and Board Member. We encourage patients to explore community involvement opportunities and support groups, both in person and online.

The Multiple Sclerosis Society

The Multiple Sclerosis Society provides education and resources to the MS patient population, fundraises nationwide to fund research for a cure, and leads awareness worldwide about the concerns of those diagnosed with MS.

The MS Society holds nationwide events, *Walk MS*, to fundraise for cure research. Visit the MS Society's website to learn more and start your own team, or ask your MCMS team member about joining our team!

MS Views & News

MS Views & News is a resource and community support hub for individuals, families, and care partners affected by multiple sclerosis. Online and in-person educational seminars, mental health sessions, guided exercise programs, and other community events are available to join for free all year round.

The MS Caregiver Connection

The MS Caregiver Connection provides a wealth of information and support for the family and friends that care for their loved ones experiencing life with MS. This includes education on navigating the healthcare system, relationship support, and financial planning assistance.
